

Protecting Maryland's Voting Process

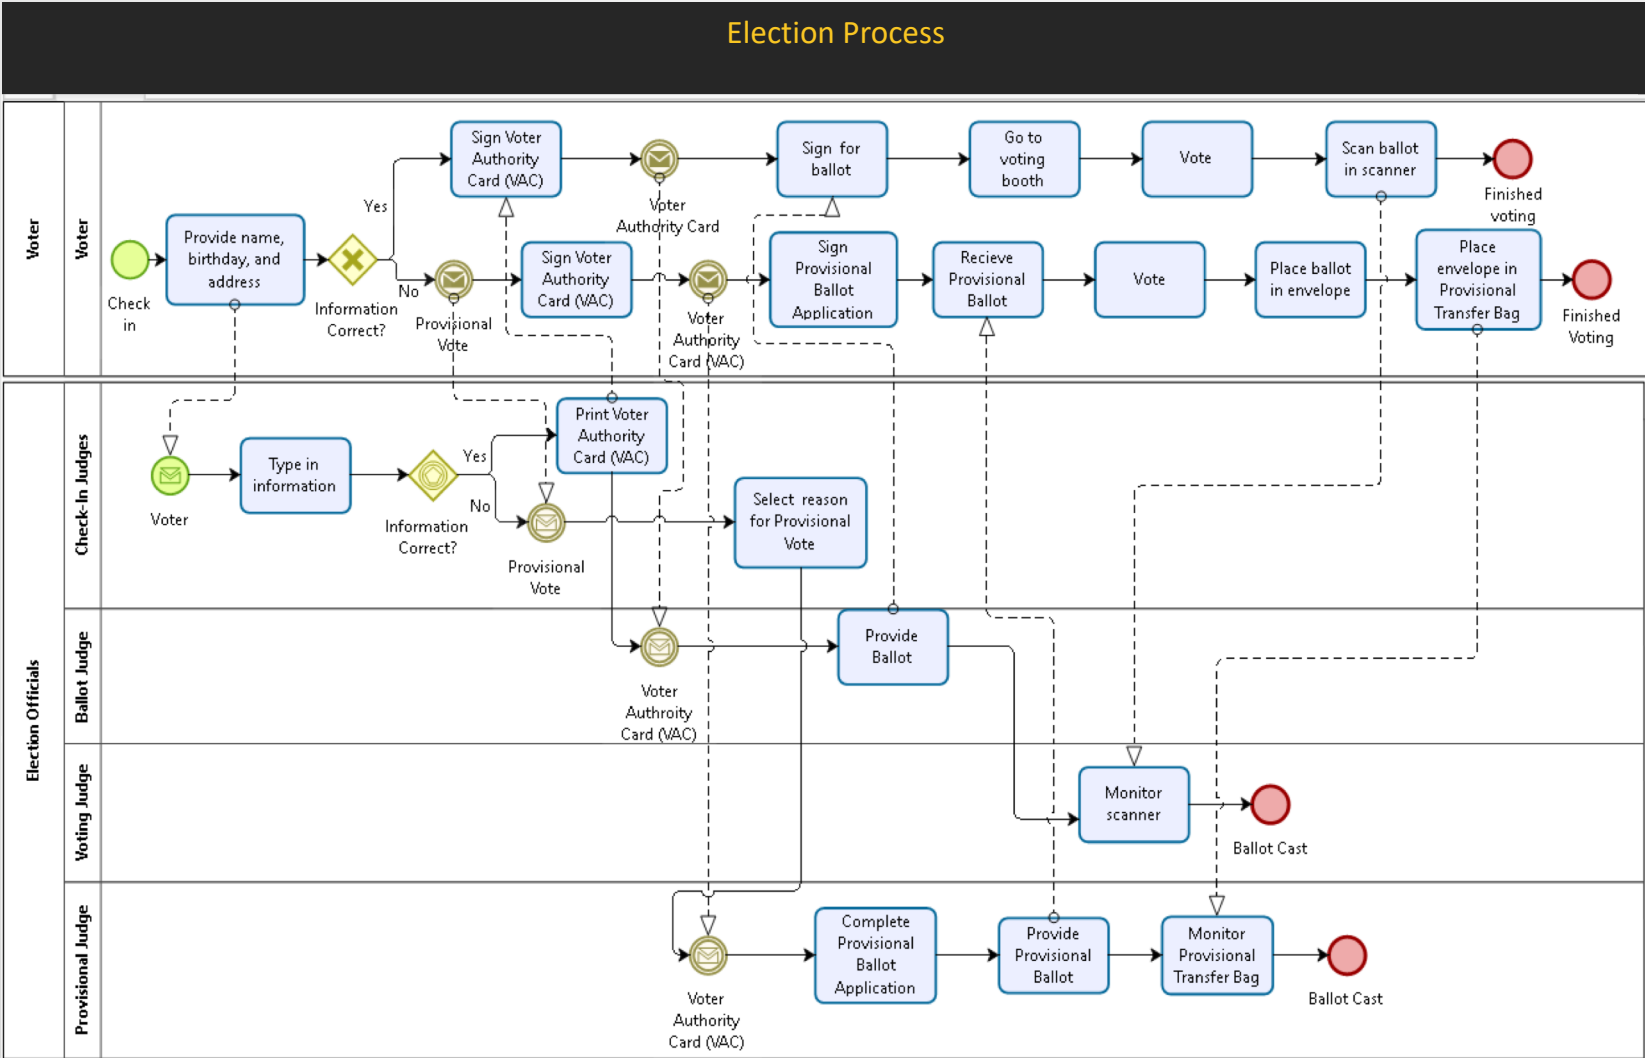

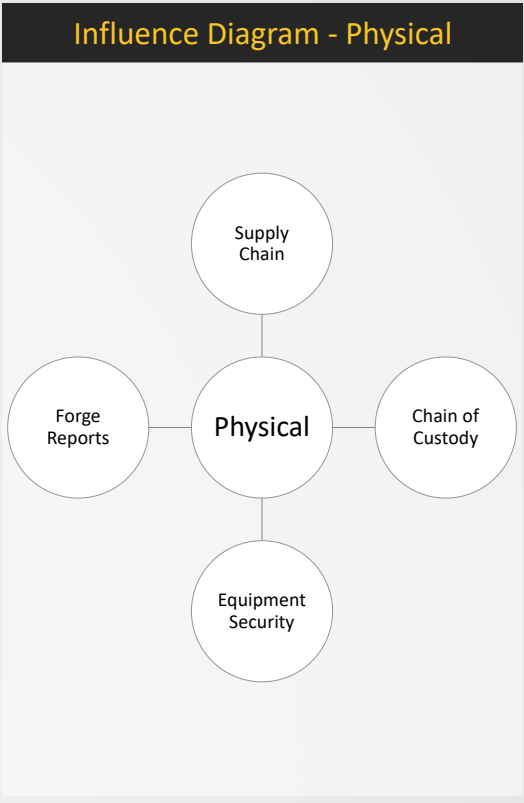

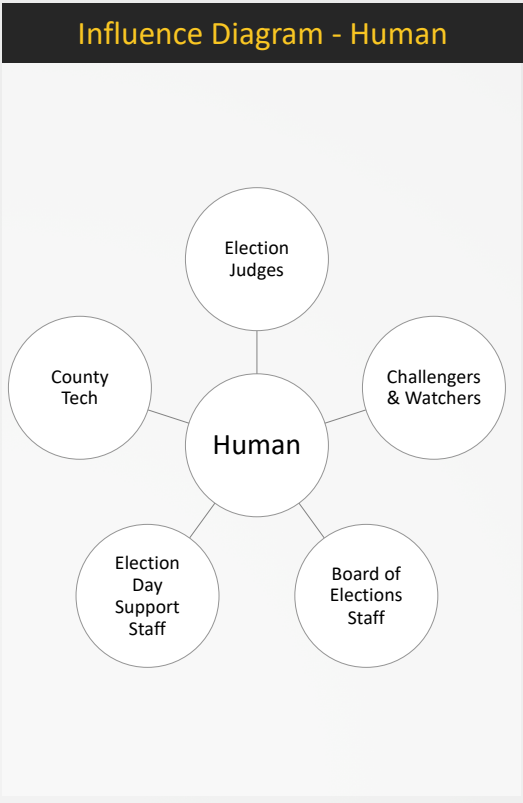

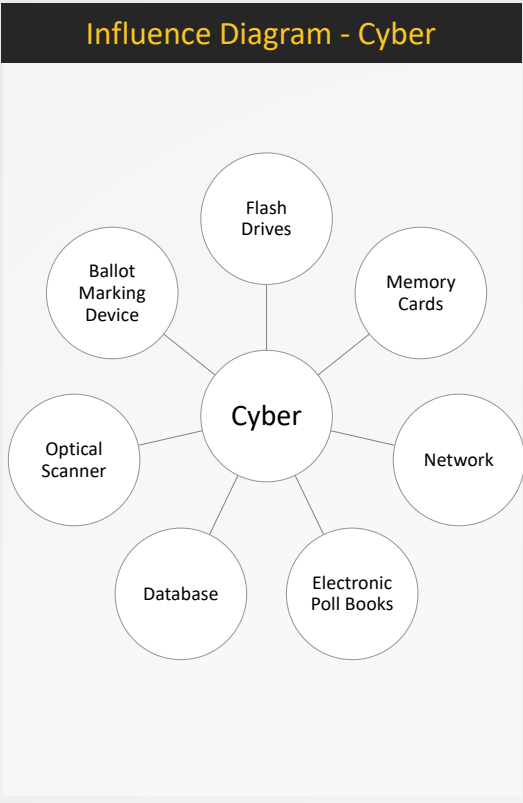

Megan Price • Advisor: Dr. Natalie M. Scala

Motivation

- **Help America Vote Act of 2002** - Reform voting processes, changes include:
 - New electronic equipment
 - No punch cards
- **2016 Presidential Election** - Department of Homeland Security reports 21 states targeted¹
- **Research** - Cyber, physical, and human vulnerabilities of election process
- **Analyze** - State of Maryland's election process including:
 - Optical scanners
 - Poll books
 - Election judges
- **Mitigation** - Resolve vulnerabilities to manage risk
- **Impact** - Assess risk to:
 - Improve processes
 - Decrease threats

What's Next?

- **Measure Risk** - Vulnerabilities measured for probability of occurrence and impact
- **Scorecard** - Rate risk based on probability of occurrence and impact; ratings include:
 - High
 - Medium
 - Low
- **Best Practices** - Effective processes to implement including:
 - Education materials
 - Signs & posters
