

Ethics for an XR World

XR Symposium 2020—Coronavirus Edition

James P. Howard, II <james.howard@jhuapl.edu>

Ethics in Computing

- Artificial Intelligence
- Predictive analytics
- Hacking and misuse
- Intellectual property

So what about xR?

The World is the Same in xR

- The world didn't change
- xR provides an unlimited world, and without boundaries
- But real boundaries still apply

So what about xR?

Intellectual Property Rights

- Who owns this building?
- Can anyone model anything?
- Do owners have the rights?
- What about architects?
- What about photography?

Courtesy the Inner Arbor Trust, Inc.

IP are only the first issue...

Property Rights

- Who can augment my reality?
- Can Niantic put a Pokéstop in my living room?
- What about projected messages on buildings?

Courtesy Flickr / Anna Fox

Reach out and touch someone...

Personal Rights

- Who can model me?
- What about children?
- What about deep fakes?

Who will exploit whom first?

More Sources of Problems

- Action at a distance
 - War
 - Surgery
- Accessibility
 - Accommodations?
- Blended interactions
 - Telepresence robots
- Community-development?
 - Are we all in this together?
- Experiences
 - Can we copyright an experience?
- Museum artifacts
 - Looted artifacts?

This is a mess.
